Goal:

Frontend Developer

Summary of Qualifications

With 8 years' experience in IT and ERP, I work as a programmer with experience in web application development. I have knowledge of various technologies and concepts, such as React, Next.js, Redux, Hooks, Javascript, HTML, CSS, Angular, API consumption, Sass, Tailwind CSS, PostgreSQL, Docker, unit tests, Git, Webpack, among others. On the backend, I've also had experience with C# and Node.js.

In addition, I am adept at good development practices, using agile methodologies, clean coding practices, application performance optimization, responsive design, code standardization and version management. I have a proven track record of effective team collaboration, meeting deadlines, and am always enthusiastic about learning and applying new knowledge.

Work Experience

OCTO Tecnologia e Consultoria

Position: Software Developer.

08/2021 – 01/2023.

As a front-end developer I worked in internal and external projects performing maintenance and creating new features to improve the user experience, with different stacks using Javascript, HTML, CSS, Bootstrap, JQuery, Ajax, among others.

Acting front-end with Angular and back-end in C# in the maintenance and creation of modules of an ICMS credit recovery system for a client in the accounting segment.

Worked in ERP systems using React, ASP.NET and C# in order to maintain the system and create new features for internal system users of Multidrogas chain, Kingcase stores, among other companies.

OCTO Tecnologia e Consultoria

Position: Technical Support Coordinator.

08/2020 – 08/2021

As coordinator, I held meetings with customers to discover the needs of the companies, analyze the entire sales journey to enable the customization and molding of the system in order to deliver the best solution for the customer.

After system validation, I performed technical training with all the customer's staff.

Coordinating a team of 5 internal support technicians, I was responsible for training the concepts used in ERP systems, such as: sales module, stock, CRM, NF-e, CF-e, among others.

I also monitored the customer service provided by the team, and performed technical analysis and implementation of solutions.

Freelance Developer

03/2018 – 08/2020

Development of landing pages and web applications involving technologies such as: HTML, CSS, Bootstrap, jQuery.

Hipertec Sistemas

Position: Technical Support Analyst.

01/2015 – 06/2018

As an analyst, I provided customer service with the objective of solving problems in ERP systems.
