Kayo Kalinauskas

FULL STACK DEVELOPER | JAVA · SPRING BOOT · REACT · TYPESCRIPT

São Paulo, Brazil | +55 17 99265-0014 | kalinauskas@live.com | kalinauskas.dev | linkedin.com/in/kayokalinauskas | github.com/kayokalinauskas

PROFESSIONAL SUMMARY

Developer with 10+ years in technology across web development, ERP systems and integrations. I build applications with React and TypeScript on the front end and Java and Spring Boot on the back end, backed by automated tests and CI/CD. I currently support the integration partners of the Bluesoft ERP APIs, which gave me a strong foundation in APIs, databases and production troubleshooting. I am looking for a full stack developer role where this foundation and a clear view of how each failure affects the business make a difference.

SKILLS

Front end: React, Redux, TypeScript, JavaScript, Next.js, Angular and Tailwind CSS.

Back end: Java, Spring Boot, JPA/Hibernate, Maven, REST and SOAP APIs, Node.js, C#, ASP.NET and WebSocket.

Data: SQL, PostgreSQL and Oracle.

Testing and delivery: JUnit, Jest, Vitest, E2E tests, Git/GitHub, GitHub Actions (CI/CD) and Docker.

Integrations: OAuth 2.0, JWT, API Keys, webhooks, logs and observability.

Processes and languages: Scrum/Kanban, technical documentation, Portuguese (native) and English (advanced).

PROFESSIONAL EXPERIENCE

API and Integrations Support Analyst

Bluesoft Sistemas Oct 2023 - Present | São Paulo, Brazil

- Investigate incidents in the Bluesoft ERP APIs by analyzing requests, responses, logs and SQL queries, find the root cause and guide fixes with the Development team.
- Support integration projects for partners such as Neogrid, Scanntech, Zanthus, Arius and InfoPrice, among others, from onboarding and kick-off through UAT and post-release follow-up.
- Act as the bridge between clients, partners, Product and Development, documenting requirements and solutions.

Full Stack Developer

OCTO Tecnologia e Consultoria de Softwares Aug 2021 - Jan 2023 | São José do Rio Preto, Brazil

- Built features for internal and client systems with React, Redux and Angular, and C# and ASP.NET on the back end.
- Evolved the MasterSGi ERP, used by 30+ clients such as Multidrogas and Kingcase, across modules and integrations.
- Implemented modules for an ICMS tax credit recovery system for accounting firms, with Angular and C#.

Earlier Experience in ERP Support

- Technical Support Lead, OCTO (Aug 2020 - Aug 2021): led the support team, ERP rollouts and client training.
- Technical Support Analyst, Hipertec Sistemas (Jan 2015 - Jun 2019): ERP troubleshooting backed by PostgreSQL queries.

PROJECTS

Ozamigos: real-time screen sharing

Java, Spring Boot, React, TypeScript, WebRTC, Electron github.com/kayokalinauskas/ozamigos

- Open source app for Windows and the browser that streams game screens between PCs in real time (peer-to-peer), with voice and chat.
- Java and Spring Boot back end with real-time messaging over WebSocket, automated tests and continuous delivery with GitHub Actions and Docker.

Payment Method Mapping: bulk import into the Bluesoft ERP

JavaScript, Vite, Tailwind CSS, Web Workers, REST API github.com/kayokalinauskas/bluesoft-subfinalizadora

- Internal tool that lets the implementation team do the mappings on their own through the ERP API, with no request queued for another team, plus spreadsheet validation and an error report.

Acelerato Helper: Chrome extension for the support team

JavaScript, Chrome Extensions (Manifest V3) github.com/kayokalinauskas/acelerato-extension

- Published on the Chrome Web Store and used by 60+ people: quick access to tickets and protection against losing unsaved comments.

EDUCATION AND COURSES

B.S. in Computer Science | Anhembi Morumbi University | 2023 - expected 2027

Java Programming | mooc.fi (University of Helsinki) | 2023 | algorithms and object-oriented programming in Java

Ignite | Rocketseat | 2021 | React, Next.js, TypeScript, Node.js, Docker, CI/CD and design systems

CS50: Introduction to Computer Science | Harvard | 2019 | C, Python, SQL and JavaScript
